

Master Flash[®]

UK Product Catalogue

Master Flash® — Product Overview

STANDARD

Solutions suitable for a wide range of applications. They can be mounted on pipes with diameters from 1 to 39-1/2" (0-1000 mm). The flashing is installed by sliding it down the pipe or from the side of the pipe.

FOR ELECTRICAL INSTALLATIONS

Solutions designed for electrical installations for various types of equipment. They are used for the installation of solar panels, heat recovery systems, air conditioning or lighting masts and antennas.

MASTER FLASH®
MIDDY

MASTER FLASH®
SOLAR
MULTI-PORT MR

MASTER FLASH®
MULTI PORT

FOR SQUARE PROFILES

Solutions designed for use with square profiles. aluminium clamps or built-in latches allow for installation on existing installations. There are variants available to fit different sizes of square profiles.

MASTER FLASH®
MULTI-FLASH
SQUARE VENT

MASTER FLASH®
RETROFIT
SQUARE VENT

FOR SPECIAL APPLICATIONS

Solutions designed for buildings with steeply sloping roofs. They allow pipes to be routed at angles of up to 90°. They also enable the sealing of irregularly shaped openings and passages around windows and chimneys.

MASTER FLASH®
EXTREME
ANGLE

MASTER FLASH®
SOLAR

FOR FACADES AND FLAT ROOFS

Solutions designed for flat roofs and passages through building walls. They seal passages for taps, ventilation openings, and air conditioning pipes. These solutions are also used in industrial ventilation systems.

MASTER FLASH®
LOW-PROFILE

MASTER FLASH®
LOW-PROFILE
MULTI

The Master Flash® product series provides a proven solution for sealing roof penetrations such as pipes, cables, chimneys and ventilation ducts. The flexible design allows the flashing to adapt to different diameters and roof profiles, ensuring a simple and reliable installation.

Characteristics of Master Flash® series products:

- Made of EPDM or silicone – materials resistant to low and high temperatures;
- Available in a wide range of versions and sizes that can be tailored to individual needs;
- Resistant to weather conditions such as precipitation, UV radiation, and ozone exposure;
- Installation possible in as little as 5 minutes – no specialised equipment required.

Master Flash®		EPDM 500	Silicone
OZONE RESISTANCE tested to:		70 h @500 pphm	70 h @ 500 pphm
HIGH TEMPERATURE RESISTANCE			
tested to:	temporary spike:	+135°C (+275°F)	+260°C (+500°F)
	constant conditions:	+100°C (+212°F)	+225°C (+437°F)
LOW TEMPERATURE RESISTANCE tested to:		-55°C (-67°F)	-74°C (-101°F)
TENSILE SET maximum:		10 MPa (1450 psi)	5 MPa (725 psi)
COMPRESSION SET maximum:		25%	50%

Master Flash® Standard

Our bestseller. A flexible solution at an affordable price.

- Material: EPDM / silicone
- Installation range: pipe diameter from 0" to 39 1/2" (0-1003 mm)
- Installation: by sliding the flashing down the pipe
- Intended use: for various types of metal roofs
- Base: square
- Roof pitch: from 0° to 40°
- Warranty: 25 years

Installation — Master Flash® Standard

Select an appropriate Master Flash® Standard. If necessary, use the lines clearly shown on the flashing to trim an opening 20% smaller than the pipe diameter. For the steep roof slopes or higher corrugation of the profile, a larger Master Flash® size should be selected.

Slide the Master Flash® down the pipe.

Press the Master Flash® Standard down and bend it to match the roof profile or surface irregularities. A blunt tool will help to form flashing to tight roof angles.

Apply sealant between the base of the flashing and the roof.

Use fasteners to complete sealing. For a secure installation, fastener spacing must not exceed 1.5" (38 mm).

Installation kit — Master Flash® Set

For all types of Master Flash® we offer dedicated installation kits that include:

- silicone;
- a set of screws.

Master Flash® Multi

A series of products with the widest range of applications.

Master Flash® Multi can be cut and installed from the side of the pipe.

- Material: EPDM / silicone
- Installation range: pipe diameter from 0" to 28 1/2" (0-724 mm)
- Installation: by sliding the flashing down or from the side of the pipe
- Intended use: for various types of metal roofs
- Base: square
- Roof pitch: 0° to 40°
- Warranty: 25 years

Master Flash® Multi

No.	Pipe Range		Roof Pitch	Catalogue Number		A-Top Opening	B-Base Dimensions

8	6 3/4" - 13 1/2" (171-343 mm)	6 1/2" - 12 3/4" (165-323 mm)	0-40°	MF801BA-G	MF802RA-G	Open	17" (431 mm)
9	9 1/2" - 20 1/2" (241-521 mm)	9 1/4" - 20 1/2" (235-520 mm)	0-40°	MF901BA-G	MF902RA-G	Open	25" (635 mm)
Maxi	12" - 28 1/2" (305-724 mm)	11" - 28" (279-711 mm)	0-40°	MF951BA-G	MF952RA-G	Open	34" (863 mm)

Installation — Master Flash® Multi

Select an appropriate Master Flash® Multi. If necessary, follow the lines clearly shown on the flashing and create an opening 20% smaller than pipe diameter. For the steep roof slopes or higher corrugation of the profile, bigger size of Master Flash® Multi should be chosen.

If you are using this product on an existing installation and it is not possible to slide it on from above, cut the side at the clearly marked point on the Master Flash® Multi.

Slide the Master Flash® Multi onto the pipe from the side.

Press Master Flash® Multi down, bending it to conform to roof profile or irregularities. A blunt tool will help to form flashing to tight roof angles.

Apply sealant between the base of the flashing and the roof, as well as at the cut location.

Place the stainless steel gripper on the Master Flash® Multi to close and secure the product.

Tighten the stainless steel gripper.

Use fasteners to complete sealing. For a secure installation, fastener spacing must not exceed 1.5" (38 mm).

Master Flash® Retrofit

Flange designed for existing installations where it is not possible to slide the seal onto the top of the pipe.

- Material: EPDM / silicone
- Installation range: pipe diameter from 1" to 16 1/4" (25–413 mm)
- Installation: by sliding the flashing from the side of the pipe
- Intended use: for various types of metal roofs
- Base: square
- Roof pitch: from 0° to 40°
- Warranty: 25 years

Master Flash® Retrofit

No.	Pipe Range	Roof Pitch	Catalogue Number		A-Top Opening	B-Base Dimensions
			black EPDM	red Silicone		
1	1" - 4" (25 - 102 mm)	0-40°	RF101BP	RF102RS	Open	8 3/8" (203 mm)
2	4" - 9 1/4" (102 - 240 mm)	0-40°	RF201BP	RF202RS	Open	14 1/4" (362 mm)
3	9 1/4" - 16 1/4" (235 - 413 mm)	0-40°	RF301BP	RF302RS	Open	21 1/2" (546 mm)

Installation — Master Flash® Retrofit

1
Select the appropriate Master Flash® Retrofit.
If necessary, trim the opening to fit the pipe diameter.

2
Slide Master Flash® Retrofit sideways onto the pipe.

3
Secure Master Flash® Retrofit around the pipe using
the plastic clamps provided to seal the flange.

4
Apply the sealant to the area between the flange
and the roof surface.

5
Use self-tapping screws to attach
Master Flash® Retrofit to the substrate.

6
Drill holes in the flange for the fastening strap. Thread the strap through
the hole. Tighten the fastening strap securely to ensure a proper seal.
Additional sealant can be applied between the flange and the pipe.

Master Flash® Fix-A-Flash

Roof flashing designed to correct roofing errors. It is ideal for passages where the opening is much larger than the pipe.

- Material: EPDM / silicone
- Installation range: pipe diameter from 0" to 15" (0-380 mm)
- Installation: by sliding the flashing down the pipe
- Intended use: for various types of metal roofs
- Base: square
- Roof pitch: 0° to 40°
- Warranty: 25 years

Master Flash® Fix-A-Flash

No.	Pipe Range	Roof Pitch	Catalogue Number		A-Top Opening	B-Base Dimensions
			black EPDM	red Silicone		
1 (Standard 8X)	0" - 15" (0 - 380 mm)	0-40°	FF851BC	FF852RC	Closed	19 1/2" (496 mm)

Master Flash® Universal

Ideal solution for sealing multiple passages next to each other. Product with a smaller base area.

- Material: EPDM / silicone
- Installation range: pipe diameter from 0" to 19" (0–483 mm)
- Installation: by sliding the flashing down the pipe
- Intended use: for various types of metal roofs
- Base: round
- Roof pitch: 0° to 40°
- Warranty: 25 years

Master Flash® Universal

No.	Pipe Range	Roof Pitch	Catalogue Number		A-Top Opening	B-Base Dimensions
	Standard		grey EPDM	red Silicone		
1	*0 - 1 7/8" (0 - 47 mm)	0-40°	RD101GG	RD102RA	Closed	4 3/4" (120 mm)
2	1 3/4" - 3" (45 - 76 mm)	0-40°	RD201GG	RD202RA	Open	6 1/4" (158 mm)
3	*0" - 5" (0 - 127 mm)	0-40°	RD301GG	RD302RA	Closed	7 3/4" (196 mm)
4	3" - 5 3/4" (75 - 160 mm)	0-40°	RD401GG	RD402RA	Open	9 1/4" (234 mm)
5	4 1/2" - 7 1/2" (114 - 190 mm)	0-40°	RD501GG	RD502RA	Open	10 1/2" (266 mm)
6	5" - 9" (125 - 230 mm)	0-40°	RD601GG	RD602RA	Open	12 1/2" (317 mm)
7	6" - 11" (150 - 280 mm)	0-40°	RD701GG	RD702RA	Open	14 1/2" (368 mm)
8	7" - 13" (175 - 330 mm)	0-40°	RD801GG	RD802RA	Open	16 1/2" (412 mm)
9	10" - 19" (254 - 483 mm)	0-40°	RD901GG	RD902RA	Open	25 1/4" (641 mm)

* #1 Universal and #3 Universal models may have a small hole at the top (a few mm in diameter). This is not a full opening; however, the product is not completely closed in such cases. This should be taken into account if the product is to be used as a hole cover.

Master Flash® Residential Aluminium Master Flash® Residential Lead

The aluminium base of the flashing allows for an ideal fit on bituminous roofs.

- Material: EPDM / silicone
- Installation range: pipe diameter from 3" to 17 3/4" (75–450 mm)
- Installation: by sliding the flashing down the pipe
- Intended use: for various types of bituminous roofs
- Base: rectangular
- Roof pitch: 20° to 40°
- Warranty: 25 years

3	11 1/2" - 17 3/4" (300 - 450 mm)	20-40°	RL301BA		Open	35" x 35" (889 x 889 mm)

Installation — Master Flash® Residential

Adjust the flashing to the correct pipe diameter.

Apply sealant to the underside of the metal base.

Slide the flange onto the pipe.

Secure the metal base with nails and a hammer.

Install the roof tiles along the sides of the Master Flash®.

Finish installing the roof around the roof flashing.

Master Flash® Solar Multi Port Aluminium Master Flash® Solar Multi Port Lead

Designed for routing pipes for solar panels and electrical installations through bituminous roofs.

- Material: EPDM
- Installation range: pipes with a diameter from 0" to 1¹⁵/₁₆" (0-49 mm)
- Installation: by sliding the flashing down the pipe
- Intended use: for various types of bituminous roofs
- Base: rectangular
- Roof pitch: 20° to 45°
- Warranty: 25 years

Master Flash® Solar Multi Port Aluminium

Master Flash® Vertical Tile Flash Aluminium

Solution for sealing pipe penetrations in flat roofs. Provides a secure, durable seal for roofing systems including bitumen and flat tile roofs.

- Material: EPDM
- Installation range: pipes with a diameter from 2" – 13" (50-330mm)
- Installation: by sliding the flashing down the pipe
- Intended use: flat roofing systems incl. bitumen and flat tile roofs
- Base: rectangular
- Roof pitch: 20° to 45°
- Warranty: 25 years

Master Flash® Vertical Tile Flash Aluminium

Catalogue Number					
No.	Pipe Range	Roof Pitch	black EPDM	A-Top Opening	B-Base Dimensions

Master Flash® Middy

Flashings from Middy series enable the passage of elements with a very small diameter.

- Material: EPDM
- Installation range: pipe diameter from 0" to 2" (0–50 mm)
- Installation: by sliding the flashing down the pipe
- Intended use: for various types of metal roofs
- Application: photovoltaic installations
- Base: square
- Roof pitch: from 0° to 45°
- Warranty: 25 years

Master Flash® Middy

Master Flash® Solar Multi-Port Metal Roof

Designed for routing pipes from air conditioning or photovoltaic installations. It has 5 dedicated ports.

- Material: EPDM
- Installation range: pipe diameter from 0" to 1 $\frac{5}{16}$ " (0–49 mm)
- Installation: by sliding the flashing down the pipe
- Intended use: for various types of metal roofs
- Application: intended for air conditioning systems
- Base: square
- Roof pitch: 0° to 40°
- Warranty: 25 years

Master Flash® Solar Multi-Port Metal Roof

Master Flash® Multi Port

A solution designed for routing pipes from air conditioning or photovoltaic installations.

- Material: EPDM
- Installation range:
 - » Standard: pipe diameter from 0" to 2 3/4" (0-70 mm);
 - » Multi: pipe diameter from 1 1/4" to 2 1/4" (32-64 mm);
- Installation: by sliding the flashing down the pipe or from the side of the pipe
- Application: compatible with photovoltaic installations
- Intended use: for various types of metal roofs
- Base: square
- Roof pitch: from 0° to 40°
- Warranty: 25 years

Master Flash® Square Vent Multi

This flexible roof transition is designed for sealing square profiles and ducts. It is applied to the pipe from the side when sliding it on from above is not possible.

- Material: EPDM
- Installation range:
 - » Standard: pipe diameters from 0" to 5" (0–127 mm);
 - » Multi: pipes diameters from ¾" to 4 ½" (19–114 mm);
- Installation: by sliding the flashing down the pipe or from the side of the pipe
- Intended use: for various types of metal roofs
- Base: square
- Roof pitch: from 0° to 40°
- Warranty: 25 years

Master Flash® Square Vent Multi

Master Flash® Retrofit Square Vent

Flashing designed for square profiles and ventilation openings.
Ideal when installation is not possible by sliding the flashing down the pipe.

- Material: EPDM
- Installation range: pipes diameter from 2¼" - 5" (57-139 mm)
- Installation: by sliding the flashing from the side of the pipe
- Application: designed for various types of square profiles
- Intended use: for various types of metal roofs
- Base: square
- Roof pitch: from 0° to 40°
- Warranty: 25 years

Master Flash® Extreme Angle

Roof flashing designed for roofs with a steep slope.

- Material: EPDM / silicone
- Installation range: pipe diameter from 0" to 8" (0–203 mm)
- Installation: by sliding the flashing down the pipe
- Intended use: for various types of metal roofs
- Base: square
- Roof pitch: from 35° to 65°
- Warranty: 25 years

Master Flash® Solar

The diameter of the flashing hole is adapted to hydraulic pipes for solar installations.

- Material: EPDM
- Installation range: pipe diameters from 3/4" to 1" (19-25 mm)
- Installation: by sliding the flashing down the pipe
- Application: designed for sealing pipes in solar water heating systems
- Base: round
- Roof pitch: from 0° to 90°
- Warranty: 25 years

Master Flash® Low-Profile

Master Flash® Low-Profile Multi

A solution dedicated to sealing passages through building walls.

- Material: EPDM / silicone
- Installation range: pipe diameters from 0" to 12 1/2" (0–318 mm)
- Installation: by sliding the flashing down the pipe or from the side of the pipe
- Application: intended for passages through building walls
- Intended use: for various types of metal roofs
- Base: round
- Roof pitch: from 0° to 90°
- Warranty: 25 years
